WHY Stouffville:

Working for the Town of Stouffville means being a part of one of HRD Canada's Best Places to Work. Here, we foster a sense of belonging as a tightknit workforce. The Town is dedicated to supporting employees by offering competitive wages, opportunity to participate in OMERS pension plan, flexible schedules, complementary gym membership and access to our employee discount program.

Join a collaborative and technically advanced IT team where you'll contribute to impactful projects like HRIS implementation and ERP system migration, while gaining exposure to diverse business areas across the municipality. This role offers the opportunity to work on both simple and complex initiatives, fostering growth in a supportive environment that values adaptability, communication, and teamwork.

We are committed to being an equal opportunity employer, supportive of an inclusive, barrier-free recruitment and selection process and as we grow, it's important that our workforce reflect the citizens we serve. At the Town, we respect, encourage, and celebrate our diversity. If contacted for an employment opportunity, please advise if you require accommodation.

Position Purpose:

Reporting to the Chief Information Officer, the Systems Developer is responsible for the development, implementation, operation, support, and maintenance of a portfolio of enterprise business systems. The Systems Developer will work closely with other IT resources on supporting enterprise systems infrastructure; and facilitate the integration of data from a variety of business applications. The Systems Developer will work collaboratively with business users, vendors, and other IT resources as part of a cross-functional project team to optimally configure and deliver new application solutions to the organization.

Qualifications and Requirements:

- University degree in Computer Science or equivalent combination of relevant experience and education in a related field.
- Minimum 5 years of progressive work experience in the Information Technology field with an emphasis on enterprise system solutions implementation, administration, and technical support
- Extensive work experience with IT business systems infrastructure and architectural design, client-server & web applications, web servers (IIS, Tomcat, Apache), API integration frameworks and application integration.
- Expert knowledge of T-SQL, Reporting Services (SSRS), and Integration Services (SSIS).
- Advanced working knowledge in data engineering and designing and developing ETL solutions. Experience with FME would be considered an asset.
- Demonstrated exceptional Microsoft SQL Server database administration skills.

- Advanced hands-on experience with programming languages such as C#, ASP.NET, PHP, HTML, CSS, JavaScript, and Visual Basic for Applications (VBA) and Microsoft Access development.
- Working knowledge of command-line scripting languages to support process automation (e.g. PowerShell, Perl, Python, etc.)
- Experience in creating technical architectural design documents providing a high-level overview of the components and fundamental interactions within the system.
- Broad knowledge of server and network infrastructure, operating systems, Active Directory, and mobile technologies.
- Knowledge of Office 365, SharePoint and Azure is considered an asset.
- Excellent written and oral communication skills with a proven ability to explain complex technical concepts into understandable terms for business users.
- Working knowledge of server and network infrastructure, operating systems, Active Directory, and mobile technologies. Hands-on experience using command-line scripting languages to support process automation (e.g. PowerShell, Perl, etc.).
- Demonstrated practical experience with the implementation and support of ERP solutions based on Microsoft Dynamics GP with hands-on application design, development, and customization expertise. Advanced knowledge of the Microsoft Dynamics GP security model and database schema would also be considered an asset.
- Working knowledge or experience with any of the following packaged applications would be considered an asset: WordPress, CLASS/ActiveNet, CityView, iCompass Agenda Management, AIMS
- Knowledge of current and emerging technologies with the ability to evaluate and recommend the integration of new technologies into a complex IT environment.
- Highly developed analytical and problem-solving skills with keen attention to detail.
- Excellent interpersonal skills with ability to establish and maintain effective consulting relationships with internal clients in order to provide exceptional and timely customer service.
- Good time management and organizational skills; adept at effectively dealing with multiple competing priorities while consistently meeting deadlines.
- Excellent written and oral communication skills with a proven ability to explain complex technical concepts into understandable terms for business users.
- Possession of a valid Ontario Class "G" Driver's License and access to a vehicle for use on corporate business (mileage compensated).
- Other duties as assigned.
