DOWNTOWN REVITALIZATION Update: Utility Investigation

Project background:

The design consultant, Accardi Engineering Group is currently working on the Downtown Revitalization project. This phase of the project consists of undertaking detailed design, all which will lead to the construction of new infrastructure and the beautification of the downtown core.

What's next:

Over the week of May 25, 2026, the subcontractor 4Sight Utility Engineerings will be performing subsurface utility engineering (SUE) investigation along Main Street from Park Drive to Edward Street. This investigative work finds and maps underground utilities, pipes and wires, to ensure safe digging and construction. It is expected this work will be completed by end of May 2026.

Impact on residents:

Please use extra caution in the area during this time as there will be workers present. Some parking spots will be occupied in the area that investigations are taking place with contractor vehicles and equipment. These parking spot closures will move along the road as this work progresses. Police officers and or authorized personnel (such as specialized Traffic Agents) will direct traffic to manage congestion and maintain flow at busy intersections during peak hours.

The Town appreciates your cooperation and patience during this work.
